Experience

- Sansrujan Information Technology** 15/01/2024 - 15/07/2024
Software Developer Intern
During my internship at Sansrujan, I developed web and mobile application applications. Technologies used are React Native, PHP, JavaScript, CSS, and Laravel. I optimized performance, enhanced SEO, and collaborated on various projects, improving my skills in web technologies and version control.

Education

- Goa University** Current
Master's in Computer Application
- Dnyanprasad Mandals college and Research centre, Goa** 2022
Bachelors of Computer science Honours
GPA 7.49

Skills

- Languages and Markup: [HTML, CSS3, JavaScript, C, C++, PHP]
- Frameworks & Technologies: [React Native, Bootstrap, Laravel, Node.js, Firebase]
- Tools & Platforms: [Visual Studio Code (VS Code), Git, GitHub, Android Studio, Postman, cPanel, FileZilla]
- Soft Skills: [SEO, Website Optimization]
- Databases: [MySQL]

Projects

- Portfolio Website**
 - Created responsive web pages, implemented animations, used Fetch API for backend processing, Showcased professional skills, projects, and experiences on a personal website with a clean design, contact form, and CV download.
 - Technologies & Features: HTML, CSS, JavaScript, Bootstrap, Fetch API, Form validation.
- YuvaJagruiti Web Application**
 - Developed frontend features, added contest information, and enhanced security using form sanitization to avoid XSS. The web application allows participants to register for different contests, storing data in a database and preventing multiple registrations.
 - Technologies & Features: HTML, CSS, PHP, MySQL, GitHub, AJAX, Form Sanitization.
- Relish Asian Food Industries Website**
 - Created a webpage, added a WhatsApp button, optimized with SEO using Lighthouse, and enhanced security with form sanitization. Designed and developed an e-commerce website to highlight food products, focusing on quality, hygiene, and user experience.
 - Technologies & Features: HTML, CSS, JavaScript, PHP, SEO tools, AJAX, Form Sanitization.
- Eventify Web Application**
 - Designed admin dashboard UI, added DataTables, and developed email notifications. This platform manages events for colleges and businesses, streamlining organization and tracking contributions, transactions, and attendance.
 - Technologies & Features: Laravel, PHP, MySQL, DataTables, JavaScript, Email Notifications, AJAX.
- Eventify Mobile Application**
 - Implemented screen navigation, splash screens, and event listings with Axios for data fetching. The mobile app allows members to manage event participation, including registration, viewing details, tracking participation, and receiving updates.
 - Technologies & Features: React Native, Axios, JavaScript, Android Development, Screen Navigation, Splash Screens.

Achievements & Awards

- NCC Navy C Certificate Holder
- Participated In National Integration Camp (Mysore, Karnataka)
- Participated at National Level Sailing Camp (INWTC, Vasco)
